

MEET US AT R+T 2018

WORLD'S LEADING TRADE FAIR FOR ROLLER SHUTTERS, DOORS/GATES AND SUN PROTECTION SYSTEMS

27 February - 03 March 2018

R+T is the leading world trade fair for roller shutters, doors/gates and sun protection systems. All international companies of any standing are represented here. At R+T you will find everything there is in the area of roller shutters, doors/gates and sun protection systems: from exterior Venetian blinds to awning control systems, from fire protection doors and gates to security equipment. But R+T is also the trade fair for innovations, which is impressively demonstrated by the submission of over 80 entries for the Innovation Prize at R+T 2015. Experience high-tech at first hand. The key exhibition areas, which also coincide with the key B2B topics are:

- Awnings Plant equipment
- Computers
- Drive and control systems
- Doors/Gates Associations
- Doors Industry literature / publications
- Electrical safety devices
- External venetian blinds
- Grilles and fences
- Internal sun protection Services
- Research and development
- Roller shutters and accessories
- Technical textiles and textile construction
- Window shutters and accessories
- Windows and window accessories

For the 5th time, the Enterprise Europe Network is organising international b2b meetings during this trade fair. Almost 70 companies from 20 countries will have one-to one meetings during this event. The event has been supported by 17 EEN offices (eight members of the sector group sustainable construction), which were committed to send clients as well as 6 BCCs from Australia, Canada, Republic of Korea, United States, Singapore and Guinea. Further information regarding the B2B event can be found at the following website: <https://www.b2match.eu/RT-2018/>

Contact person for the B2B is:

Participants from Sector Group Sustainable Construction at the R+T B2B

Alaris Czech republic, s. r. o.

www.alaris.cz, www.alaris-pergoly.com

Company Alaris Czech republic, s. r. o. is one of the leading Czech producers of sun protection systems. Our main products are sun protection blades and bioclimatic rainprotection pergolas PLACEO. All of our products are made of aluminum profiles. Our goal in 2018 is to enlarge expansion within Europe. We are looking for potential suppliers and customers of our goods. We are able to compete with european companies for our prices which match the company size. Alaris Czech republic has also a long tradition in participation in tenders as a main supplier. For example sun protection systems of hospitals in Gabon or Laos can be mentioned. On R+T 2018 we will focus on presentation of bioclimatic aluminium pergola PLACEO. Pergola PLACEO is a unique construction which provides shadowing, roofing and regulated ventilation. It is designed in minimalist style with flat roof and acute rectangular features of supporting construction. In closed position it perfectly drains rain water thanks to unique shape of roof profiles and therefore it keeps dry environment and space on the patio. To provide perfect endurance, pergola is made of solid aluminium alloy with stainless steel components. We provide also accessories for pergola PLACEO (sun and rain protection blinds - screens, LED lighting, heating etc.).

CATHEDRAL Software, s.r.o.

www.ariscat.com

CATHEDRAL Software was established in 1996 and its current activities focus on the development and implementation of information systems. One of the company's main business activities is the development of its own information

www.tentoexpress.gr

Awnings – Aluminium pergola systems – Clear PVC screens – Awning systems. TENTOEXPRESS was founded in 1974 in Thessaloniki, Greece, and its professional activity has since then focused on the manufacture and installation of all types of awning and shading systems. Since 1985, TENTOEXPRESS has also been manufacturing aluminium and iron awning arms, as well as other awning spare parts. In 2014, pergola-awning systems were added to the SUNRAIN systems series, manufactured from scratch in the TENTOEXPRESS factory in Neo Rysio, Thessaloniki. Pergola-awning systems started to be exported by means of TENTOEXPRESS representatives across Greece and Europe. Currently, the following products are available for wholesale or retail distribution: Awnings <https://tentoexpress.gr/en/product-category/awnings> Pergola systems <https://tentoexpress.gr/en/product-category/pergola> Clear PVC screens and enclosures <https://tentoexpress.gr/en/product-category/windshield-transparent-awnings> Electric awning motors and automations Shading systems Awning canvases and fabrics PVC, plastic covering materials and fabrics Tarpaulins Crystal clear PVC panels Digital awning printing Basket-style awnings (basket awnings for windows) Entrance sheds Car sheds Cassette awnings Roller blinds, roller shades, vertical awnings Time switches Electric awning crank handles Electric motors Wind sensors Photocells Blinds Outdoor furniture Umbrellas Lounge swing chairs Special constructions Parking space constructions German Markilux shading systems Italian heavy duty awning systems On account of its reliability and consistency, TENTOEXPRESS is the representative of the most renowned firms in the field of shading systems, such as Swela (German awning fabrics), NYFAN TENCATE (Dutch awning fabrics) and Marlon awning fabrics. Our company is a vertically integrated firm, staffed with experienced professionals, and our establishments involve a privately owned property equipped with modern, latest-technology equipment. Our work philosophy and experience renders our firm one of the few productive units in this professional field. We offer top quality products at the most competitive prices on the shading system market. We would be more than happy to have you visit our establishments and provide you with the opportunity to find out more about our potential. In addition to that, we are always available for a visit to your space, in order to present you with samples of our work, and provide you with ideas and solutions concerning awnings and shading systems, as well as colours and designs that could add to the aesthetic value of your balcony, patio or garden, based on our long-term professional expertise. Within the scope of a potential future cooperation, we promise full commitment, fast service, and top quality, at the best possible prices and the most irresistible offers. Always with the TENTOEXPRESS golden guarantee. At the 19thkm on the Thessaloniki-Moudania highway, in the area of the bridge of N. Rysio, top quality awing gear, arms, and various awning accessories are manufactured in our production unit. Additionally, our facilities include a fully equipped workshop for the welding and seaming of awning fabrics and tarpaulins. Simultaneously, for your convenience and easy access, you can find our products exhibited at our store located near the center of Thessaloniki, at 121 K. Karamanli street (former Nea Egnatia street). Nea Poteidaia, Chalkidiki (Nea Poteidaia bridge) Thanks to our customers' trust and support, TENTOEXPRESS services, including both wholesale and retail distribution of our products, have reached an even larger number of satisfied clients. Apart from the manufacture and installation of awning systems for domestic and professional uses, the product range of TENTOEXPRESS also extends to a wide variety of outdoor furniture pieces.

Libart Project and Application

www.libart.com

LIBART started its operations as an independent company in 1996. Prior to this date, Libart was part of the Libra group of companies that was established by its founder Mr. Cem Comu. Vision for Libra and its offshoots like Libart was to serve building industry within Turkey and surrounding countries, with innovative architectural products and solutions. Other companies within the Libra group specialized in automated entry access systems, façade materials and skylight glazing. From 1992 to 2002, LIBART was a large player within Turkey and surrounding countries for custom designed skylight and light operable architectural systems, utilizing aluminum, glass and pc glazing. Starting 2003, Mr. Comu started Libart's international expansion by opening a North American office in Canada, primarily to serve USA and Canadian markets. Until the start of production in Ohio - USA in 2009, all systems sold in North America were shipped from Istanbul Turkey. Through Libart's history, R&D, engineering, designs and user satisfaction has met or exceeding demanding specifications of the market for operable architectural solutions. Libart systems can be grouped in the following areas; freestanding retractable structures, retractable skylights and vertically opening glass façade systems, but not limited to these as we listen and innovate. LIBART's has stayed true to its roots and still maintains its main office and its international headquarters with a 3000 square meter manufacturing facility in Istanbul Turkey. All international systems provided by Libart, R&D, new product development, system design and engineering is done in the Istanbul office. Outside of America markets, Libart exports to over 30 countries, from Istanbul facility. LIBART currently operates with a team of 68 skilled staff at its headquarters in Istanbul. The production area occupies over 3,000 square meters with advanced design and manufacturing know-how and machines. Libart USA factory employs over 35 personal from a 6500m2 manufacturing facility. Looking forward, LIBART's vision is to be the global leader in operable architectural solutions, utilizing light aluminum structural systems with multiple glazing options, insulated glass, pc to high-tensile fabric. Our goal is to be solution center for discerning architects and designers seeking innovative operable architectural solutions. Key strengths of LIBART are: leading the industry in architectural retractable/operable structures; increasing recognition of benefits of multi-purposing inside and outside spaces; leading the world in conceptual innovation of retractable aluminum structures; North American and global presence; Capability to create Innovation and design for the needs of architectural projects. Increased awareness through marketing continuously increases the strength of the company and grows the company's moat.

OBA PERDESAN PERDE SAN AS

www.obaperdesan.com.tr

Baier GmbH

www.baier-gmbh.de

For more than 40 years Baier now has been specialised in the development and production of moving façade elements which it also assembles throughout the whole of Germany and Europe. In addition to classic light metal engineering, the delivery programme includes a portfolio of sliding windows and sliding shutters, driving technology, roof window blinds and door technology. Furthermore, Baier is also an accredited dealer for other well-known brand names. Baier starts where standard solutions stop. Baier also places significant emphasis on sustainability. In the context of function, manufacture as well as design. We see ourselves as a respectable partner of building contractors, architects and craftsmen who enforce particularly high demands with regard to individuality and perfection. Constant further developments and innovations are an integral part of our company philosophy. Together with you, we work out the right solutions for your ideas and guarantee that these are implemented to your entire satisfaction. This is how individual construction projects come about in the private and industrial fields which point the way forward in design. Without detracting from function, safety or comfort in any way. Reliably and within the cost limits discussed. So that your façade also creates moving moments.

Z-Wave Europe GmbH

www.zwave.eu

Z-Wave Europe based in Hohenstein-Ernstthal pioneered in importing the first Z-Wave products to Europe as a Value Added Resellers in 2008. Since then Z-Wave Europe has been the leading Value Added Distributor for Z-Wave based wireless home automation controls facing high and steady growth in its business. Under its motto "We make life easier" the company provides products and services to transform houses, apartments and offices into a smart homes. The company sells exclusively Z-Wave certified devices to wholesalers and distributors. In close cooperation with the Z-Wave Alliance Z-Wave Europe promotes the dissemination of Z-Wave technology as the largest existing ecosystem for wireless home automation. Together with Z-Wave.Me, a Swiss-German-Russian company, Z-Wave Europe develops software for various applications of the technology. This includes, among other things, "Z-Way", the first certified Z-Wave controller software. Further information can be found on the company's website at www.zwave.eu.

Zink GmbH

www.zink-software.de

The Zink GmbH is a software company from Germany, which is offering a unique storage software for craft companies which facilitates the documentation of all business processes within a company, is searching for cooperation partners, sales partners and a sales platform. The CEO himself has his professional background in the craft sector and originally developed the software only for its own use. For him, the most important requirement when developing the software was that the software has to be very easy to use. The software should store the most necessary information in a structured database. The software is mainly based on the barcode technology-every document is branded with a barcode and therefore clearly assignable to each client and his/her order. At the end of each working day, each document is scanned and automatically assigned to the respective order by the software. With this software, document management, booking of working hours, stock management, order systems, paperless production, taskplaner, customer relationship management, etc. is an automatic process with barcodes which is easy to handle by every employee.
